AMENDMENTS TO THE SPECIFICATION

Please amend the title as follows:

~~METAL WIRING BOARD AND METHOD FOR MANUFACTURING THE SAME~~
HAVING METAL SUBSTRATE AND ELECTRICAL WIRING

Please amend the paragraph that begins on page 5, line 1, as follows:

The metal plate 10 is stamped in predetermined wiring patterns including wiring portions 11, each of which functions as an electrical wire, and terminal portions 12. More precisely, the metal plate 10 is a cluster of the wiring portions 11 arranged in the predetermined wiring pattern and held together with a case 20. The terminal portions 12 are provided at ends of the wiring portions 11 for connections with external devices. The metal plate 10 has a surface including soldering areas 40 that are conductive areas for electrical connection and non-soldering areas 41 that are electrically isolated areas coated with solder resist.
